

GRP corduroys and blister panels
for all public access applications

GRP tactile panels offer a ready solution to meeting the access requirements of the Disability Discrimination Act 1995 (DDA).

With a low profile base and with bevelled edges all round, individual panels can be installed in minutes over the *existing substrate with little or no preparation work required.

Whether in the BLISTER design or the CORDUROY design, all panels are 400 x 400mm and are available in a choice of two colours; Buff and Terracotta.

The BLISTER panels reveal 36 domes in two configurations; regular for STREET applications and off-set for RAIL applications. The CORDUROY version has 8 raised strips. All dome and strip dimensions are as specified in Approved Document M of the UK Building Regulations.

Being manufactured from GRP, the panels are light, extremely robust and furthermore, have a surface coating of oxides and aggregates to provides durable slip resistance in all weathers.

*must be sound and level.

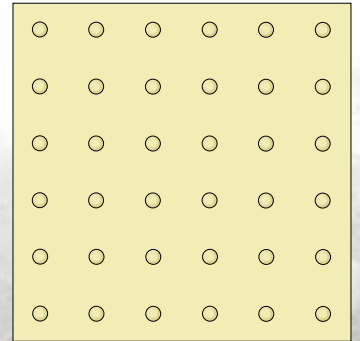

Our extensive catalogue includes many other access and slip resistant products . For further information please visit our website or contact our sales office at the address below.
